Modern Conditions and Women's Health

THE stress and strain of present day conditions impose an increasing demand on the physical and nervous stamina of every individual. This is particularly marked in the woman who, in spite of periodic changes in health, has to carry on during these critical times with her duties in the home, in the office and factory, in National Service with her customary cheerfulness and efficiency. It is not surprising therefore that many women have come to dread the approach of the monthly change with its attendant pains, headaches and lassitude.

Medical Advances

Medical Science has long searched for an effective remedy for these periodic pains. The recent discoveries by the technical research consultants of W. J. Rendell, Ltd., has shown that a special formula (used with success by eminent specialists in women's diseases during the past few years) can be rendered much more effective by the use of a special method of manufacture.

DISCOVERY OF MENSINOLE

This method results in a more rapid utilization of the preparation by the body and ensures the relief of the complaint with a speed and completeness hitherto unexampled in other preparations of this kind. This new preparation is called MENSINOLE and is now made available to the public by the sole manufacturers, W. J. Rendell, Ltd., the pioneers of products for feminine hygiene.

Properties of Mensinole

COMPOSITION OF MENSINOLE

The Mensinole formula is compounded with the purest and finest quality ingredients and is free from all narcotic and dangerous drugs. It is not a mere stimulant to be followed by unpleasant and depressing after effects but is a speedy and effective pain reliever.

NO DANGEROUS DRUGS

Mensinole tablets are absolutely safe and cannot harm the heart or digestive organs. Furthermore their continued use over long periods will not lead to a state of tolerance, that is, the body will not get accustomed to the tablets so that they begin to lose their effect, nor do they cause habit formation as do the narcotic drugs.

PROTECTS HEART AND DIGESTION

Action of Mensinole

RELIEVES PAIN The chief action of Mensinole is in the relief of pain, particularly pain of the nervous type as is associated with dysmenorrhoea (painful periods), headaches, migraine and neuralgia.

WOMEN'S PERIOD PAINS The alleviating effect of Mensinole in these conditions is rapid and certain, and the ensuing relief is conducive to sleep. The tablets also possess anti-spasmodic and sedative

NERVE SEDATIVE properties which renders them particularly valuable in uterine colic (womb pain) and in the nervous irritability and exhaustion commonly associated with period troubles.

REDUCES FEVER Mensinole will not produce any harmful after effects nor will it cause any prolongation of the flow. When fever is present Mensinole will quickly reduce the temperature and aid in the elimination of accumulated poisons and toxins from the system, thus ensuring a speedy return to health.

Other Uses

HEADACHES NEURALGIA & NEURITIS

While Mensinole is primarily intended for the relief of women's periodic pains its unique combination of anti-pain, anti-fever, sedative and purifying properties make it valuable

RHEUMATISM AND LUMBAGO

in a number of other complaints. It is the best antidote for all forms of headache, neuralgia, neuritis and nervous irritability. Sufferers from rheumatism and lumbago find it

COLDS AND INFLUENZA

invaluable since not only will it quickly relieve the attacks but if taken regularly will help to prevent the recurrence of the trouble. As a cure for threatened colds, sore throats, and influenza, Mensinole is unrivalled.

TRAVEL SICKNESS

Travellers find the sedative properties of Mensinole ideal for the treatment and prevention of train. air and sea sickness.

FOR CHILDREN

Mensinole may safely be administered to children in doses regulated according to the instructions below.

Directions for use

WOMEN'S PERIOD PAINS, HEADACHES, NEURALGIA AND NERVOUS IRRITABILITY.

Two tablets placed on the tongue and quickly swallowed with a little water or a hot drink. One or two tablets to be repeated in three hours if necessary.

(*For these conditions in adolescent girls — half the above doses.*)

RHEUMATISM, LUMBAGO AND NEURITIS.

Two tablets with water three times a day. As a preventive of further attacks — one tablet two or three times a day after meals'

HEADACHES, MIGRAINE, NEURALGIA, TRAVEL SICKNESS, AND ALL NERVE PAINS.

Two tablets with a draught of water. Repeat in 3-6 hours if necessary.

COLDS, SORE THROATS AND INFLUENZA.

Two tablets at night, preferably with a warm drink or hot toddy. Repeat at six-hour intervals till the attack passes off.

FOR CHILDREN.

One quarter to one half the above doses.
